

SI Inverse 4k

SI Inverse 4K is a 3D printer based on DLP LED technology. This latest top-down technology printer is the largest in its category. This 3D printer does not use a vat tray, which leads to no peeling. Hence we can use a better wax-content material that gives a better casting result. The tray-less printer gives a better surface and uses less support for printing. DLP technology will make your purchase satisfying and your investment worthwhile.

MACHINE SPECIFICATION

Platform size	215 x 120.9 x 120 mm
X&Y Resolution	55u
Z Resolution	20 to 75 u
Pixel Size	0.055 mm
Speed	300 Layer per hour
Light Engine Resolution	3840 x 2160
Machine Warranty	3 Years
Software up gradation	Life Time
Open Source Consumables	Yes
Installation	Free
Transportation & Packaging	Free
Transportation Insurance	Free
Training	Free for 5 days
Operating System	Inbuilt Display
UV Curing Oven	Free
Resin Direct Castable	500 ml Free
Accessories	UV Torch, Spinner, Spatula, Isolator, rubber silicon wiper
Dimension	470 x 775 x 900mm (W,L,H)

Input File

STL & SLC
