X & Y RESOLUTION	55μ
Z RESOLUTION	20 to 75 μ
PIXEL SIZE	0.055 mm
MACHINE WARRANTY	3 Years
SOFTWARE UPGRADE	Life Time Free

SI Inverse 4K is a 3D printer based on DLP LED technology. This latest top-down technology printer is the largest in its category. This 3D printer does not use a vat tray, which leads to no peeling. Hence we can use a better wax-content material that gives a better casting result. The tray-less printer gives a better surface and uses less support for printing. DLP technology will make your purchase satisfying and your investment worthwhile.

SI ULTRA 2000

PLATFORM SIZE (XxYxZ)	150x84.51x150 mm 5.90x3.32x5.90 inch

ABOUT US

Sculptoris innovation is among the most recognized and recommended names in high-precision and top-notch 3D printers. Our products have become an inevitable part of the jewelry industry. Our primary goal is to help you create accurate RPT/CAM prints with the finest details that make a long-lasting impression and leaves you stunned. Moreover, all our machinery is designed with expertise and innovation that meets international-level standards.

Sculptoris Innovation is a new venture of NCH Group co-founded by Mr. Vivek Sojitra and Mr. Ghanshyam Khanpara. We are well known among jewellery manufacturers for the optimal performance of machines and after sales support.

OUR MISSION

**To Fulfil desire of customers and give best solution through our ever-evolving products and services.
To maintain healthy relationship with people.**
